DRAWINGS:

1. *Figures 3, 9, 10, 11, 13 and 14 are remain objected to because each of the rectangular boxes in these Figures should be labeled with numbers and they should contain a descriptive label so that the function of each rectangular box becomes appearance. Correction is required.*

(Note: The Drawings filed on 6/28/06 have not been enter because all rectangular boxes in Figure 14 has not been labeled with numbers. Please resubmit these corrected drawings including the correction of Fig. 14).

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. **Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended.** The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing

Art Unit: 2138

sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-8 are remain rejected under 35 U.S.C. 102(e) as being anticipated by Marisetty et al (6,22,260).

As per claim 6, Marisetty et al disclose a test system having a system bus and capable of efficiently recovering from a system error, comprising:

A first local nonvolatile memory in a first test entity for storing error information generated in the first entity; and

A processor programmed for executing a recovery sequence upon detection of the system error to re-initialize the system bus without a need to first read out the error information from the first local nonvolatile memory. (See col. 1, lines 44-48, col. 2, lines 38-43, col. 3, lines 21-35, col. 5, lines 15-67 to col. 6, lines 1-3).

As per claims 7-8, Marisetty et al further disclose:

A second local nonvolatile memory in a receiving entity for storing commands or data to be received;

Wherein the processor is further programmed for executing a recovery sequence upon detection of the system error to re-initialize the system bus without a need to regenerate or re-transmit the commands or data stored in the first or second local nonvolatile memory at the time of the system error. (See col. 1, lines 44-48, col. 5, lines 15-67 to col. 6, lines 1-3 and col. 7, lines 10-12).

As per claims 1-5, these method claims are rejected under similar rationale as set forth in the system claims 6-8.

4. Applicant's arguments filed 6/28/06 have been fully considered but they are not persuasive because:

Applicant argues that Marisetty does not disclose storing commands or data and silent regarding executing a recovery sequence without needing to regenerate or retransmit the stored command or data.

Examiner disagrees with applicant because Marisetty does disclose storing commands or data prior to executing a recovery sequence and executing the recovery sequence without needing to regenerate or retransmit the stored command or data. (See abstract, col. 9, lines 28-38 and col.10, lines 41-47),

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on 571-272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
